

Vacancy: Project Manager – Life Sciences

Location: Maastricht, NL
Hours: Minimum 32 per week

ReGEN Biomedical is a startup company that aims to revolutionize the manufacturing of large numbers of high quality functional micro-tissues for drug testing and regenerative medicine therapies.

Would you like to help us achieve this goal?

We are looking for a Project Manager with experience in Research & Development environments within the Life Sciences sector. This role is ideal for someone with a structured approach, strong analytical skills, and the confidence to ask critical questions. You will work in an international, multidisciplinary environment, supporting projects that have a significant societal impact.

Key Responsibilities:

- Support grant-funded projects by ensuring compliance with funding requirements
- Coordinate with scientists, engineers, and stakeholders to streamline workflows
- Oversee and manage supply chain and facility activities incl. but not limited to purchasing, facility validations and warehousing,
- Oversee scientific project planning, timelines, budgets, and stakeholder expectations.
- Identify and mitigate risks, proposing solutions to optimize processes.
- Report project progress effectively, with strong documentation and reporting skills.

Your Profile:

- 5+ years of experience in project management within Life Sciences, particularly facility management.
- Ability to collaborate with multidisciplinary teams—experience in collaborative, multidisciplinary projects is highly valued.
- Experience with LIMS or ERP systems
- Laboratory experience is a strong plus, preferably in cell biology field
- Knowledge of GMP, ISO, and other regulatory requirements.
- A structured approach, with strong attention to detail and problem-solving skills.
- Organizational skills and a hands-on mentality to drive project execution.
- Result-oriented mindset, with the ability to adapt to dynamic challenges.
- Excellent communication skills—ability to share results, issues, and progress effectively with diverse teams.
- Fluency in English

We Offer:

- A challenging role in a high-impact field that is constantly changing
- A collaborative and professional international work environment in an international team
- ReGEN Biomedical has an a pleasant working atmosphere and an open culture
- The opportunity to work on projects that make a tangible difference in society.
- Competitive salary based on education and expereince
